

Ar. Mousami Wadikar

(B.Arch & M. Arch in Urban Design)

Associate Professor, AIKTC, SoA

An Architect and Urban designer by profession, an eye towards depth and living life as a celebration. A strong believer of multiplicity and always keen to explore something new.

Mousami Wadikar is an associate professor at Aiktc, SoA, affiliated to Mumbai University. Her passion for research lead her towards specialization in Urban design from Mumbai University in 2016 after 12 years of experience in practice.

From 2001-2004 she worked as an assistant Architect with various eminent architectural firms in Aurangabad. From 2005-2013 Mousami served as a consultant Architect for Three Plus institutional and health care campuses of Mahatma Gandhi Mission trust spread all over Navi Mumbai. Her consulatancy and private projects include designing of Stem Cell laboratory, designing and execution of Sleep laboratory, operation theatre complex with sixteen extensive O.T.s and other support facilities.

Practice and research at two different scales have given her opportunity to understand both individual user and community as whole. Her interdisciplinary approach to research and teaching is shaped in part by her academic formation in three spatial disciplines- Architecture, Humanities and Urbanism.

“Architecture is journey to unknown and cities are mystery of multiple lives”Mousami Wadikar
