

Ar. Suvidha Sagave

(B.Arch & M. Arch in Environmental Architecture)
Assistant Professor, AIKTC, SoA

Sividha is an architect with perspective of Environment. She is Diligent, detail oriented, acquainted with climate responsive building environment and energy efficient building design. While working with Ar. Ajay Kulkarni (Aurangabad) she has learned to create architecture which is context responsive and monumental.

She has done her B. Arch from MIT college of Architecture, Aurangabad in 2009 and Masters in Environmental Architecture and planning from BNCA, Pune university in 2011.

She is always curious for understanding and teaching Design as an Ecologically interdependent discipline and preserving our dying traditional wisdom. She believes architectural Education imparting is a constant Dialogue with which ideas bloom and is paraphernalia. Keen for process rather than product.

Her husband being Civil Engineer, both of them are exploring construction industry with 8 years of practice in interior, residential and commercial projects. She has a teaching experience of over 5 years. Her love for music, books and travel added to her persona. It has been her constant endeavor to achieve holistic development for architectural profession by striving to build a symbiotic relationship between the three key facets of Academics, research and practice.
